RENTAL

RENTAL

If the circles were one of the topics which companies from all over Europe were acquiring information about for many years, we can currently see a very interesting development within the (medium) pre rig trusses and heavier ground support systems area.

We have anticipated this development and therefore made a decision to make some considerable investments in this area. We have currently included more than 1500 running meters on the P60R and P50SL truss in our rental stock. Plus plenty of box corners, book corners and accessories are now available for rent from us too. The 2 ton tower is also available for rent. We can currently supply 20 complete Towers. Plus we will most probably also add the P100 in 2012.

Interal Rental is aiming to also become one of the key players in the (medium) pre rig area.

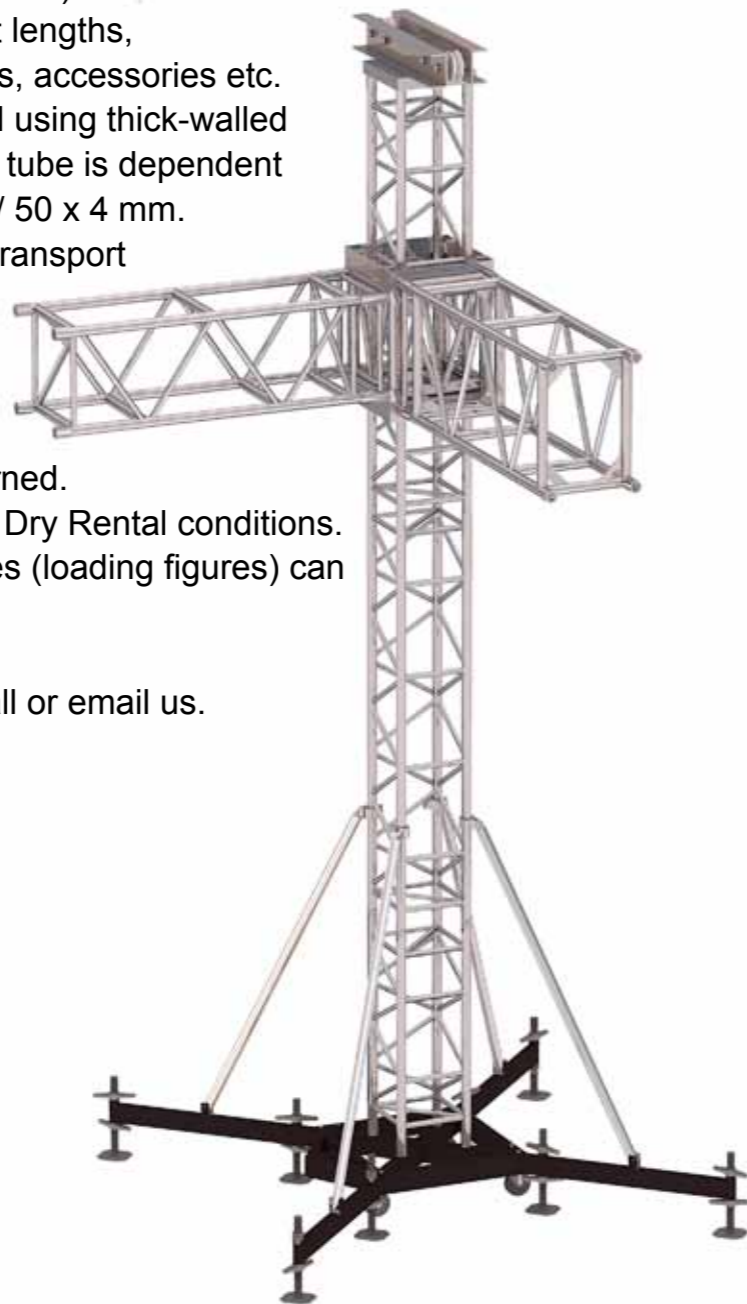

We are also one of the bigger rental companies where multi purpose trusses (30 and 40 series) are concerned. We stock large quantities of straight lengths, corner pieces, box and book corners, accessories etc. All our rental products are produced using thick-walled tubes, whereby the thickness of the tube is dependent on the type of truss: 48 x 3 / 50 x 3 / 50 x 4 mm.

Almost everything is positioned on transport dollies. We generally always organise the transport ourselves, which means we are very flexible where delivery at any specifically required time and location is concerned.

Interal tc's rentals are based on the Dry Rental conditions. Our TÜV certificates and Load tables (loading figures) can be downloaded from our website.
